

Organic Certification

Reviewed by Ashley Adair – Apr 2022

Organic vegetable farming is a production system that relies on biological processes and natural materials to manage soil fertility and pest populations, and to promote healthy crop growth. The federal Organic Foods Production Act regulates the use of the term “organic” to describe an agricultural product in the marketplace. Vegetables sold as “organic” must be grown and handled according to the National Organic Rule and any applicable state regulations. The National Organic Rule prohibits the use of most synthetic chemicals (fertilizers, pesticides, etc.), and requires farmers to write and follow organic production plans, as well as keep farm and field records. Fields used to grow organic crops may not have had any prohibited material applied to them in the previous three years. In addition, USDA-accredited organic certification agents must inspect and certify all operations with more than \$5,000 in gross annual sales of products labeled “organic.”

Growers interested in transitioning to organic production should educate themselves about practices used in their area and plan carefully. Experience suggests that it can take a number of years for pest populations and soil nutrient cycles to adjust enough for successful organic production.

This guide includes recommendations for some inputs that are permitted in certified organic production, but also for many that are not. The note ‘OMRI-listed’ indicates pesticides that have been listed by the Organic Materials Review Institute (OMRI) as approved for use in organic production in the U.S. Growers should always check with their organic certification agents before using any product to make sure it meets their certifier’s criteria.

Other organic production resources include:

eOrganic, the Organic Agriculture Community of the Extension Foundation eorganic.org

Organic Vegetable Gardening Techniques (University of Missouri Extension Guide G6220) provides an introduction to organic production techniques (available from University of Missouri Extension Publications, extension.missouri.edu/publications).

Resource Guide for Organic Insect and Disease Management (Cornell University) provides specific recommendations for pests and diseases of major vegetable crops (available at northeast.sare.org/resources/resource-guide-for-organic-insect-and-disease-management/).

Appropriate Technology for Rural Areas (ATTRA) offers a number of publications on their website: attra.org.

The National Organic Program (NOP) offers a program handbook that provides a list of materials allowed for use in organic production, plus a complete list of accredited certification agents on their website: ams.usda.gov/nop

The Organic Materials Review Institute (OMRI) publishes a list of products they have found to meet certified organic production criteria. For details, visit omri.org/.

The Sustainable Agriculture Research and Education (SARE) program offers a number of research-based publications about pest management, including organic options. A complete catalog is available at sare.org/

If you desire organic certification, you should contact a certification agent during the period of transition to organic production. The organizations listed below have been accredited by the USDA as of April 2022.

Contact them directly for information about fees and the certification procedure. The USDA lists all accredited organizations at www.ams.usda.gov/services/organic-certification/certifying-agents.

Consult your local Extension office for other resources available in your area.

Organic certifiers servicing the Midwest

Some states do not have a National Organic Program certification agency headquartered in state. However, multiple certifying agencies service the Midwest region with traveling inspectors. Many take clients on a case-by-case basis, depending on the availability of inspectors and other factors. Here is a list of certifiers that are utilized in the Midwest, with notes on their service range if it is limited.

CCOF Certification Services, LLC

2155 Delaware Ave., Ste. 150
Santa Cruz, CA 95060
Phone: (831) 423-2263
Fax: (831) 423-4528
