

# Soybean Herbicide Rotation Restrictions

This is rotational restriction information for soybean herbicides. The products are listed alphabetically by **Trade Name(s)**, with the **Number of Months** you must wait to plant different vegetables after applying that herbicide.

AT=anytime herbicide labeled for the crop or no rotation restriction exists

FB= field bioassay required before planting the crop

NNY= not next year, the crop cannot be planted the following year

NY=the crop can be planted the year after application

V=variable, intervals vary by crop variety or other conditions specified on label

\*Transplanted tomatoes only

\*\*In Indiana only, 18m for transplanted tomatoes and peppers, cabbage, melons, and cucumbers
